

# Cal OES Daily Situation Report

## February 7, 2023

A cool, wet winter season means spring wildflowers are on their way, like these California Poppies.

<b>Coastal Flooding</b>							

Risk Levels

Little to None

Minor

Moderate

Major

Extreme

# Weather Key Points

Regional Operations Center

Western Region

Tuesday, February 7

- Periods of gusty Santa Ana winds will persist across southern California through late week, particularly on Tuesday and again Thursday and Friday
  - The strongest winds are expected across the mountains and foothills of Los Angeles and Ventura Counties, where gusts up to 50 mph are likely
- Areas of overnight and morning dense fog also remain possible through mid to late week, particularly across the San Joaquin Valley
- Outside of light precipitation across far northern California Tuesday and again Friday, mainly dry weather is expected through late week. A slow moving storm system may bring more widespread precipitation over the weekend, though at this time any precipitation looks to be on the light side.

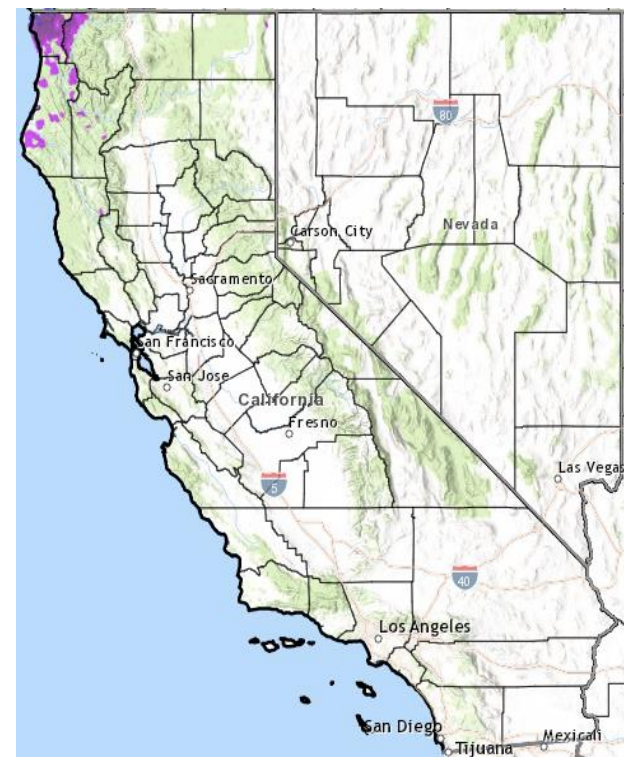

# Daily Precipitation Forecast

Regional Operations Center

Western Region

Tuesday, February 7

Tuesday

Wednesday

Thursday

**Important Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

# Weather Outlook (6-14 Days)

Regional Operations Center

Western Region

Tuesday, February 7

## **6-10 Day Outlook (February 12 - February 16)**

### **Temperatures**

- Below normal temperatures are favored statewide

### **Precipitation**

- Below normal precipitation is favored across northern California, with near normal precipitation favored for central portions of the state, and above normal precipitation slightly favored across the south

## **8-14 Day Outlook (February 14 - February 20)**

### **Temperatures**

- Below normal temperatures are again favored for all areas

### **Precipitation**

- Near normal precipitation is favored for much of the state, with the exception of southern California where above normal precipitation is slightly favored

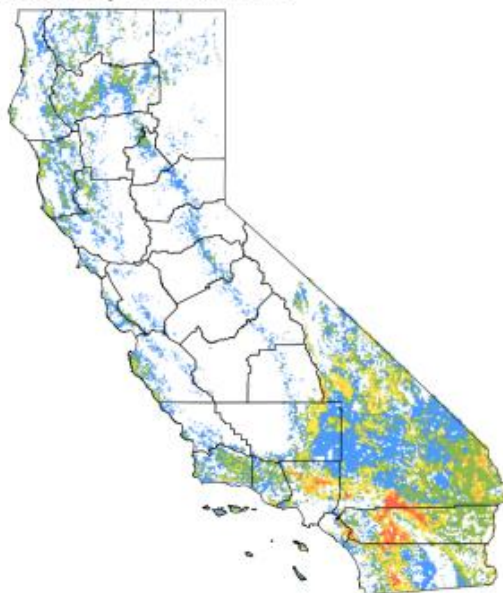

# Wildfire Forecast and Threat Intelligence Integration Center

## STATEWIDE WILDFIRE RISK POTENTIAL

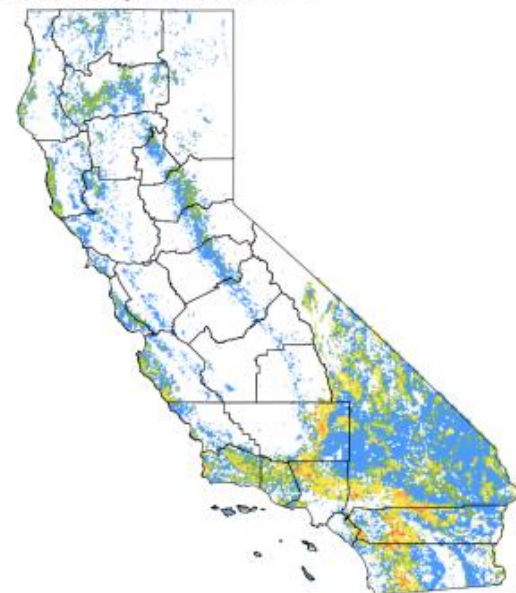

Mon Feb 06, 1200hrs

Tue Feb 07, 0900hrs

Wed Feb 08, 1200hrs

Acres

Each map shows the time with the highest wildfire risk potential. 8 hour simulations are run every three hours of the day to produce a map of wildfire risk potential in acres. The average number of acres in an area should not exceed the associated number in the legend. Risk forecast does not consider suppression efforts. Courtesy of Technosylva.

## Weekly Fire Potential and Weather Forecast

### Northern Region

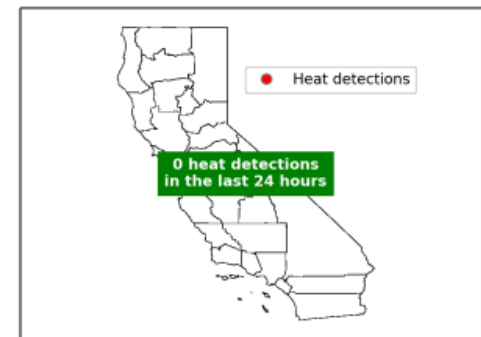

- Significant fire risk will remain in the "little to no risk" category due to very little fuel flammability alignments due to the unsettled weather pattern.
- Moisture found within the mountain snowpack currently ranges near 170-210% of normal for the date and should rise some during the next 7 days with variable snow cover but generally +3500-4500 ft.
- Dead fuel moisture values will rise and rise noticeably west of the Cascade-Sierra Crest and become less flammable overall.
- Herbaceous grass and forbs are exhibiting a solid flush of green-up, generally below 2500-3000 ft, and the abundant soil moisture will continue to feed this growth although cooler temperature periods will less the intensity of growth. The abundant standing dead from the previous growing season has been significantly altered or "melted", thus lowering the fire spread threat across many areas.
- Live woody brush-shrubs & tree canopies are becoming less flammable. Dormancy has set in across the mid & upper elevations with little change expected. Some new growth and/or moistening is occurring across the lower elevations.

### Southern Region

- There will be little or no fire activity across the region through the forecast period.
- High pressure will remain over the region through Saturday. A Pacific trough will bring cooler and more unsettled weather later in the weekend, while next week's forecast looks largely uneventful.
- Temperatures today will be similar to yesterday, with 60s to low 70s for the coasts, valleys, and deserts, and mid 40s to low 50s in the mountains. Most areas will warm 2 to 4 degrees on Saturday, with some mid 70s possible over Southern California.
- Winds will be very light today, mostly under 10 mph with varying direction. Saturday will mainly feature light onshore flow, gradually strengthening by late day.
- Minimum humidity will be 10% to 25% outside the San Joaquin Valley through Saturday.

# **COVID-19 SUMMARY**

## **Coronavirus Disease 2019 (COVID-19)**

On 03/02/20 at 0700 hours, the Cal OES State Operations Center (SOC) activated at Level 1 in support of the California Department of Public Health (CDPH) Medical Health Coordination Center's (MHCC) statewide response to COVID-19. Cal OES will continue to provide resource coordination for the COVID-19 event, as well as situation status reporting and advance planning across multiple areas.

## **SMARTER Plan**

On 10/17/22, Governor Newsom unveiled the "[California Smarter Plan Updates October 2022](#)". The plan emphasizes continued readiness, awareness and flexibility and helps ensure California can maintain its focus on communities that continue to be disproportionately impacted and stay prepared to swiftly and effectively respond to emerging COVID-19 variants and changing conditions. Governor Newsom is set to lift the State of Emergency in early 2023, and this update provides information on California's progress to date and how we move forward.

## **CDPH Statewide Travel Advisory**

- For more information: [CDC Travel Guidelines](#)

## **Confirmed California COVID-19 Cases - Per California Department of Public Health Tracking COVID-19 as of 02/01/23 at 1700 hours: (report updated bi-weekly)**

- 11,038,266 (+21,887) total confirmed cases.
- 99,401 (+271) total deaths.
- Please see the most recent "Situation Report - COVID-19" attachment for additional details.

# Cal OES LAW ENFORCEMENT MISSIONS

## Cal OES Law Enforcement Missions

**2023-LAW-93379, On 02/05/23 at 1900 hours:** Del Norte Sheriff requested the FIRIS aircraft for a missing 74-year-old female and her dog in the Siskiyou National Forest near Signal Peak in Del Norte County. Missing person was picking mushrooms with her husband and adult daughter, both of those have been rescued already. Del Norte SAR team are searching the area now. Sheriff used USCG Helo aircraft on mission using spotlight but did not have FLIR. The daughter who was rescued was located at 41-49.917N 123-57.032W. It is assumed that the missing person is somewhere near that. **Update: 02/06/23 at 0910,** FIRIS mission from last night was negative for the MP. USCG helo is searching today and FIRIS is no longer needed. **Mission closed.**

# Cal OES MISSION TASKINGS

## Cal OES Missions

- **2023-SOC-92872 T# 74559:** San Joaquin County Local Assistance Center (LAC), 1 Cal OES Taccom Access point to support staff. Equipment is on-scene.
- **2023-SOC-9872:** Calaveras County Local Assistance Center (LAC), 1 Cal OES Taccom Cradlepoint to support staff and allied agencies. Equipment is on-scene. MAR 4.
